Coming from software development, I am an operational manager, close to his team, still hands-on and versed into technology. My main activities revolve around technical discussions, management, planning, reporting, and communication while promoting automation and quality in the deliverables.

I am open-minded and used to work in multicultural environments. Beside work I enjoy being in the nature, sport (running, diving), and board games.

Skills

- Software Project Management
    - Agile Methodologies: Kanban, Scrum, JIRA
    - BI: Excel, PowerBI, Qlink, R (ggplot2)
